Émile Reynaud already mentioned the possibility of projecting the images in his 1877 patent application for the praxinoscope. He presented a praxinoscope projection device at the Société française de photographie on 4 June 1880, but did not market his praxinoscope a projection before 1882. He then further developed the device into the Théâtre Optique which could project longer sequences with separate backgrounds, patented in 1888. He created several movies for the machine by painting images on hundreds of gelatin plates that were mounted into cardboard frames and attached to a cloth band. From 28 October 1892 to March 1900 Reynaud gave over 12,800 shows to a total of over 500,000 visitors at the Musée Grévin in Paris.

First motion pictures : By the end of the 1880s, the introduction of lengths of celluloid photographic film and the invention of motion picture cameras, which could photograph an indefinitely long rapid sequence of images using only one lens, allowed several minutes of action to be captured and stored on a single compact reel of film. Some early films were made to be viewed by one person at a time through a peep show device such as the Kinetoscope and the mutoscope. Others were intended for a projector, mechanically similar to the camera and sometimes actually the same machine, which was used to shine an intense light through the processed and printed film and into a projection lens so that these moving pictures could be shown tremendously enlarged on a screen for viewing by an entire audience. The first kinetoscope film shown in public exhibition was Blacksmith Scene, produced by Edison Manufacturing Company in 1893. The following year the company would begin Edison Studios, which became an early leader in the film industry with notable early shorts including The Kiss, and would go on to produce close to 1,200 films.

The Tribeca Film Institute, a fundraising and educational non-profit, suspended operations on September 1, 2020, due to uncertainties surrounding our new reality. The Tribeca Film Festival which operates under the same parent company will continue.76 The Provincetown International Film Festival and its associated non-profit laid off its newly hired CEO and eight other staff members in 2020 due to the pandemic.77 The San Diego International Film Festival, held in October 2020, screened both online and on drive-in screens.78 In September 2021, it was announced that a person with COVID-19 attended several screenings at the 2021 Toronto International Film Festival. Films affected included Dune, Bergman Island and The Humans.79
